WEATHERMAN TREATED STONY'S GOLFERS FINE.

Well, it didn't rain on May 29th so the Golf Club is one up on the Weatherman, at last!

22 members took part in the Medal play of the opening day's proceedings. Following are the detailed scores—

Ladies—		
Mrs C Lory	37	41
Miss D Miller	39	43
Mrs Larson	38	41
Mrs G Oppertshauer	44	45
Mrs B Lewis	34	40
Mrs H Oppertshauer	32	37
Mrs Michael	48	45
Mrs Yeats	37	41
Mrs Walton, 1 round	57	
Mrs Bryan, 1 rd	47	
Mrs Hayes	42	39
Mrs Oatway, 1 rd	45	
Mrs Robertson, 1 rd	58	

Gentlemen—		
G. Oppertshauer	35	39
F W Yeats	34	33
Joe Gannon	33	31
S Comisarow	45	33
E Michael, 1 round	36	
J W McCulla 1 rd	33	
De Oatway 1 rd	53	
E Danuhausen, 1 rd	34	
W E Hayes	29	33
W E Hayes and Mrs Hy Oppertshauer took first place, winning the golf balls; with Sam Comisarow and Mrs Michael lifting the golf tee.		

The ladies, as usual, put up a splendid lunch, and ample justice was done to the fare provided. It is hoped these teas will become regular monthly affairs.

Better get some practice in, as the competitions will be starting shortly.

To Attend Lutheran Meet.

Principal A H Schwermann of Concordia College and Professors M W Riedel and W A Baspler will leave on Friday, June 14, to attend the triennial convention of the Lutheran Missouri Synod in Cleveland the following week. Rev H J Bosttoher, representing the board of education, and A G Nickel, an Edmonton layman, will attend. Rev W Eifurt, President Alberta district, will head the party.

Barrie Beach Leased.

That popular summer resort, Edmonton Beach, has been rented out by Mr Barrie for the summer season. The new proprietor is Mr Manly Wrigley of Jasper. He will take over the entire premises—dancing pavilion, store, restaurant; in fact everything but the renting of the boats, which Mr Barrie will operate himself. Mr Wrigley is a man with experience in this line, having now in operation a store in Jasper. Mr Wrigley, with his outfit, will continue to operate the business up at Jasper in connection with his newly-acquired Beach premises.

Painting the Town.

The recent wet spell had come at a rather inopportune time for Mr Fred W Saunders, painter deluxe etc., as it has interfered somewhat with his work here. He had finished several new signs, notably the one for Carl Fischer; and was finishing on painting and decorating Mr York's shop assay palace, when the rain storm arrived. However, we're likely to see Mr. Fred in action shortly.

Child Labor

In Canada, and in the western provinces particularly, as in many other agricultural countries, laws are enacted and regulations made under those laws from the operation of which the industry of agriculture and those engaged in it are exempted. For example, legislation regulating hours of labor in industry cannot well be made applicable to agriculture, although there are some idealists who, shutting their eyes to practical conditions, urge that such laws could and should be applied and enforced on the farms as well as in the factories. Workmen's Compensation Acts, passed for the protection of urban workers, are in many respects not applicable throughout the rural sections.

As we proceed to write this article, daily newspapers lie on the desk telling of the complete wreckage of the N.R.A. codes governing industry and business generally throughout the United States as a result of a decision of the Supreme Court declaring such legislation unconstitutional, being beyond the powers of Congress to enact inasmuch as it encroaches upon and usurps the constitutional rights and powers of the individual States of the Union.

Whatever varying and opposing opinions people may entertain regarding the Roosevelt experiment as a whole, there has been general approval of the provisions in the N.R.A. codes prohibiting child labor in shops and factories. It has been estimated that an army of at least 100,000 children marched out of shops and factories with the establishment of these codes, and there was a widespread belief that thereby the increasing problem of child labor had been solved for the time being at least. Now the protection afforded these children has been destroyed, although it may be hoped that those in control of industry will not revert to the employment of child labor.

Unfortunately, industry accounted for only a small proportion of the 700,000 children under 16 who were listed as working at the time the U.S. census of 1930 was taken. By far the greatest number, almost half a million, were found in the ranks of agriculture, to which the codes did not apply. It has been pointed out that the cotton fields, tobacco fields, truck gardens, beet fields, onion fields, potato fields, cranberry bogs, berry farms, hop fields and orchards with each returning season make their demands upon the nation's children, and that to hundreds of thousands of boys and girls, many as young as six, the coming of the end of school sessions means not the beginning of a holiday time of freedom and play but a period of toil that often starts at sunrise and ends at sundown.

Except for the fact that these children work in the open air, their lot is in many respects a harder one than those children in shops and factories, and one can appreciate the yearning expressed by one 12-year-old boy for the day when he will be old enough to get a job in a mill and work only eight hours a day.

The situation in Canada is, of course, not comparable to that in the United States, or in other lands where congested populations eat out an existence and intensive tillage of the land by the whole family is necessary. Furthermore, in Canada our standard of living and of education is much higher than in most countries, and in the cotton, tobacco and other fields of the southern States. Canadian parents, as a rule, are more desirous of giving their children the highest possible education than they are to work them as farm hands and profit-making laborers.

But inasmuch as many of our laws which are designed to protect urban workers and which prohibit child labor are not applicable to agriculture, a greater responsibility is thrown upon parents engaged in agriculture to protect their children and not lose sight of the humanities, the frailties, the limited powers of endurance of young boys and girls, and to remember that their proper physical development and mental outlook on life necessitate hours of play and recreation; that their bodies and minds will be stunted by long hours of work and no play. It is still true that all work and no play makes Jack a dull boy.

This is not to say that farm boys and girls should not be required to assist in the work of the farm, they should. Doing chores is part of their education and preparation for life, and it would be both foolish and wrong to do for them what they should do for themselves, or permit the development of habits of idleness or shiftlessness. But inasmuch as definite laws for their protection from what may be termed exploitation do not apply in rural as in urban life, it is all the more necessary that rural people guard against selfishness and greediness on their own part in the matter of overworking children on the farm.

Canada stands high in the matter of child labor. It is a matter of national pride that this is so. We stand high in the matter of education, and our school attendance laws afford the greatest legal protection against the exploitation of child labor, both in city and country. It should be the aim of the Canadian people as individual citizens to raise the standard of child life progressively higher as the years go by, and to completely eliminate the blot of commercialized child labor from this fair Dominion.

Live "Dragons" At Zoo

Habitants Of Dutch East Indies Taken To London

There were live dragons in King George's Silver Jubilee celebrations, but they did not take part in the procession.

There was a pair of them and they were seen for the first time by the public at the zoo.

Komodo dragon is their full name, though learned people speak of them as monitor lizards. They came from Komodo Island in the Dutch East Indies, whence they were brought by Lord Moyne, who has been there studying their habits in the wild state. Some of the animals in their native habitat are 12 feet long, and their newly-related, extinct Australian species grew to 50 feet. And these it is that are supposed to have been the originals of the dragon legends throughout the world.

Seen travelling erect on their four legs—not crawling like the alligator—with their longish heads carried aloft and the tips of their long tails sweeping the earth, they are indeed capable of inspiring fright in the primitive mind.

The pair given to the zoo are the most interesting and valuable reptiles in this wonderful collection and some striking photographs of them in their native surroundings accompany the exhibits. They were kept in the zoo sanatorium for a few days so that the keepers might study their habits, and were then put on view for the first time on the King's Jubilee Day.

A Magnificent Statue

Cleaning Revealed Effigy Of Black Prince Is Pure Gold

The Black Prince—or at least his statue—is a magnificent black. For centuries the statue over his tomb in Canterbury Cathedral has been as black as his name. It was never cleaned.

Then, about a month ago, it was. Centuries of grime and a coating of protective enamel were delicately removed under the direction of Professor W. W. Tristram.

A most beautifully wrought effigy in pure gold on a foundation of bronze was revealed. It is in almost perfect preservation and is one of the most wonderful examples of fourteenth-century craftsmanship in existence. The tomb was built 550 years ago.

"The most magnificent tomb in England," is Professor Tristram's description.

"We clean the cathedral regularly," the Dean of Canterbury said, "but for some reason, I really don't know why, it never occurred to anybody to clean the Black Prince. Now that we have done so everybody is delighted, and we are having a great many visitors. The tomb is one of the most lovely monuments in the world. Its value is incalculable."

Gasoline Discovered

Unable To Explain Gasoline Reservoir Near Earth's Surface

A huge underground lake of pure gasoline was discovered in the harbor district near Wilmington, California, causing hundreds of persons to stampede to the scene.

Shallow wells, most of them dug to a depth of only two feet, were producing from four to six gallons of gasoline an hour.

The scene, a few acres about two blocks square, was dotted with hundreds of gasoline "prospector", some of whom brought hand pumps to speed up production. Motorists filled the tanks of their automobiles and trucks.

Fire Chief Ralph Scott, at a loss to account for the gasoline reservoir beneath the earth's surface, said, however, it probably came from a leak many years ago in a pipe line leading from a refinery to a harbor terminal.

A Great Salesman

The greatest salesman of the Empire is the Prince of Wales! On a hot day, once, according to Lord Dudley, he talked in Rio de Janeiro for more than an hour. As a result British iron and steel industries received an order for a \$15,000,000 contract. Lord Dudley told the story at a meeting of the Iron and Steel Federation of which he is president.

Russia Making Rubber

Oil Waste And Calcium Used In New Process

New processes for making synthetic rubber out of the waste products of oil refineries and from calcium carbide are being tried out in Russia.

Heads of the Soviet industrial syndicates expect shortly to be manufacturing the product at the rate of 20,000 tons a year.

This will have far-reaching effects on the rubber-growing plantations of the Far East, and will upset considerably the working of the Rubber Restriction Scheme, under which 30 per cent. of the trees are not being tapped so as to force up raw rubber prices.

The first factory for manufacturing rubber from oil waste is now being started in Moscow. The lessons learned there will be applied in the construction of several large plants in the oil well districts.

About 35 pounds of rubber are produced from the waste products obtained from refining a ton of oil. In the past these products in many cases had to be wasted.

The other process, for manufacturing rubber from calcium carbide, is to be operated at Erivan, in Armenia, where a factory is now being constructed. The process is the invention of a number of young Soviet scientists working in Leningrad.

Water is added to the calcium carbide, forming acetylene, the gas of which is formed especially for lighting. Then, after a series of chemical reactions, a substance called chloroprene is produced and thus ultimately becomes rubber.

The rubber is said to have all the working and wearing qualities of real rubber, and to be very much cheaper.

Best Aid To Sleep

Formula For The Perfect Night-Cap Has Been Evolved

It is generally recognized that the best aid to sleep is warm milk; and the main use of all night-caps is not as a soporific but as a means of removing from hot milk the unpalatable taste which prevents so many people from drinking it regularly at night. Since tea is the cheapest beverage in the world, and the one that is used every family cupboard, its use in this connection is highly desirable. A formula for the perfect milk night-cap has now been evolved. Tea should be made in the usual way, which means that one teaspoonful of leaf should be allowed for each person and one for the pot. The tea should not be filled half way, and when pouring out after the usual four to five minutes infusion, the cups should be only half filled. They should then be filled up with hot milk, but not with boiled milk.

Twenty-two million cups of tea are drunk in Canada every day or over eight billion cups of tea a year. The tea industry is therefore one of the farmer's greatest allies, for investigation has shown that the number of people who drink tea without milk is almost negligible.

Welcome Heavy Rain

Australians Glad To See "Knock 'Em Down" Variety

Darwin, Northern Australia, recently welcomed the annual "knock 'em down" variety.

Although this aboriginal description of the torrential downpours, which herald the end of the wet season, sounds grim, the rains are very welcome throughout the Northern Territory. These heavy downpours towards the end of the monsoon period level the long grass which earlier falls have caused to grow to a height of six to ten feet.

In the three months following Christmas, about 40 inches of rain fell in Darwin, and the grass bordering the roads was so high that a man driving along the road could not see a friend walking along the footpath. In low-lying sections of the city grass grew in a tangled mass ten feet high. That is why "knock 'em down" rains are welcome.

Construction of the Canton-Hankow railway in China is progressing so rapidly that the line may be in operation this year.

'Tis Jolly To be Wise!

There is a lot more pleasure in rolling a cigarette with Ogden's Fine Cut—a tobacco you KNOW will pass your own tests for smoothness, coolness and fragrance.

Smart "roll-your-owners" everywhere are "wise" to Ogden's. They'll tell you that Ogden's Fine Cut and "Chanticleer" or "Vogue" papers make the right combination for rolling smooth, satisfying cigarettes.

An Old Organization

First Holstein Society Started In Germany In 1872

Cattle resembling the present-day Holstein have been bred for centuries along the south shore of the North Sea, from Holland over to Denmark. Some of the early importations into the United States came from the German province of Holstein, just south of Denmark and a breed society of that name was started in 1872. But most of the early importations came from Friesland, and the country in Holland bordering on the Zuider Zee and a Dutch-Friesian Society was started in the States in 1870. These two merged in 1885 with the name of the Holstein-Friesian Association of America. Although the most of the foundation stock of the breed came from Friesland the name has stuck, the Holstein-Friesian Association of Canada having been formed in 1901.

If you want to be popular it's a good idea to learn the art of remembering what to forget.

KIDNEY TROUBLE

will result in headaches, backaches, broken sleep, and a tired, listless feeling during the day. At the first indication of any of these symptoms, take Gin Pills for prompt, safe relief. You'll feel better, look better, sleep sounder.

Prairie Farm Rehabilitation Act Calls For The Demonstration Of Methods To Control Soil Drifting

Five township or district areas were being selected in the prairie provinces as a large scale demonstration of soil drifting control and crop production "in a community effort." Minister of Agriculture Robert Weir announced in discussing progress in the government's drouth and soil drifting program. Work was being actively pushed ahead towards the study of these areas which might best represent large areas of similar drouth conditions.

"In areas where drouth has had most disastrous consequences and where soil drifting has compelled farmers to leave their lands," he stated, "special investigations will be conducted as to the best methods of reclaiming this soil, either for pasture purposes or a revised type of agriculture in which strip farming, the use of legumes, grasses and drouth resistant cereals, the use of cover crops and cultural methods will lead development of a program of agriculture which will guarantee sustenance and reasonable security to the owner."

Most of the worst areas already had been inspected. One such area had been selected finally as a basis on which to start investigational work as to the best way and means of re-establishing grasses or crops. Several more such areas will be operated.

An initial program was practically completed, he continued, for putting into effect water development projects provided for under the Prairie Farm Rehabilitation Act. A staff of engineers experienced in this type of work would be appointed immediately "to prompt assistance may be given to those desiring to avail themselves under this act in the development of surface and ground water supplies." Small water projects were being given immediate special attention.

Although it would take another year in order to make available adequate supplies of trees yet all the resources of the Dominion forestry nursery stations were being made available for tree planting. In 1935, Farm home shelter belts would be demonstrated on all experimental stations as well as in selected township and reclamation areas, Mr. Weir said.

Strange Street

Amazing Story Of Toronto Man Who Gained Prominence In England
"Strange Street," the autobiography of A. Beverley Baxter, 44-year-old Torontonian who became editor-in-chief of Lord Beaverbrook's Daily Express, was prominently reviewed in London newspapers.

It relates the amazing story of the rise of the former assistant in a music shop in Toronto to a high post in Fleet street, a junior partner in the famous "Max and Bax" combine and finally to a position as a £50,000 a year publicity executive for a British film corporation.
"Strange Street" reveals Lord Beaverbrook's undying affection for Andrew Bonar Law, "the New Brunswick boy whom he made prime minister of Great Britain."

Westerners Honored

Fellowships to enable students to continue research work at universities of the United States, Great Britain and Europe were awarded at the annual meeting in Hamilton of the Royal Society of Canada. The following were honored: George McEwen, official of a Memphis, Tenn. firm that furnished flooring for the singer's new home. "We wanted to take pictures of the room, with our floors," said McEwen on his arrival in New York. "We asked Sir Harry and he was very agreeable about it. He said we could take the pictures and it would only cost us a guinea a room. Yes, we paid."

It is estimated that about nine million birds annually rear their young in the isolated refuge of the Pribilof Islands in Bering Sea.

It was estimated 145,000,000 pounds of duck fall yearly on greater Montreal, according to officials at McGill University.

Significance Of Jubilee

Empire Honors King Because He Is Faithful To Duty

Behind any voluntary outpouring of human sentiment, underlying the emotional manifestations in which the race delights, there is generally some sound practical instinct giving the display significance. So it is worth while to inquire what fundamental reasons lie behind the great jubilee demonstrations for the King and Queen of Great Britain.

The strength which accrues to British government from having at its head one who represents the people as a whole, and not any particular party, class or policy, cannot be questioned. It is a strength which republics lack, and which has helped to bring dictatorships in those countries which have launched republics without first building strong traditions of self-government. Paradoxically, the King is great in just such measure as he can subordinate himself to the Crown. That symbol should do more to bind than to enlarge the personality of him who wears it temporarily. And it is primarily because King George has shown himself so fully aware of this duty of self-renunciation that his people do him such honor, as a worthy guardian of an essential part of their political machinery.

Likes Winter Here Best

Governor-General's Son Does Not Want To Leave Canada

Because he likes "the winter here best," Hon. George St. Lawrence Neufville Pansy, four-year-old son of the Governor-General and Lady Beasborough, does not want to leave his native Canada.

His mother related the story at the Joan of Arc Institute in Ottawa after she had told the youngster they were leaving the Dominion.

New Island Appears

A small island has appeared in the Dardanelles near Gallipoli, between Charkuey and Maurefte. It is about 1,050 feet long and 200 feet wide, formed of sand, pebbles and sawwood-covered rocks. At the same time hills and dunes on the adjoining coast line have caved in to form deep pits. Geological experts attribute the appearance of the island to the presence of oil under the sea floor of the Dardanelles.

The SNAPSHOT GUILD

You Don't Necessarily Need An Expensive Camera

You don't need an expensive camera to get fine pictures. The one above, taken with an inexpensive camera, won the grand prize in an international contest.

There seems to be the belief among many people that it is necessary to own an expensive camera to take good pictures. Pages could be written describing the limitations of some and the versatility of others, but as our space is limited the subject must be discussed rather briefly. There are many types of cameras to meet every requirement of the photographer, whether he is an amateur or professional, but no camera is capable of taking all types of pictures under all conditions. It is true that some cameras are more versatile than others. One may have an extremely fast lens which permits the taking of snapshots under adverse lighting conditions and if it also has a very fast shutter you can take pictures of subjects moving at extreme speeds. Other cameras have lenses and shutters of various speeds to take pictures and good ones within certain limits and conditions. What I want to impress upon you is this: You do not necessarily have to own an expensive camera to take good pictures of the usual run of subjects. For instance, in an international amateur snapshot contest conducted not long ago by a large manufacturer of cameras, film and photographic supplies of all kinds, the Grand Prize of \$10,000 was awarded the picture taken with

Russian Scientists Planning To Break Record In Exploring The Depths Of The Ocean

Potatoes As Stock Feed

True Value Is Not Fully Recognized In Canada

When the true value of potatoes as feed for livestock and poultry is realized, much larger quantities than at present employed will be used. With high prices for stock and poultry feeds and a surplus of potatoes in Eastern Canada, stock raisers near the plentiful supplies of potatoes have a good opportunity to reduce their feed bills by feeding potatoes. Other countries make much use of potatoes as stock-feed. In Germany, for instance, only 30 per cent. of the total potato crop is used for table purposes, and approximately 40 per cent. for stock feeding. On the other hand, in Canada 64.5 per cent. of the crop finds its way to the table and only about 11 per cent. for stock feeding. Stock raisers, says the Agricultural Situation Outlook, recently issued by the Dominion Department of Agriculture and the Department of Trade and Commerce, would be well advised to inform themselves on the proper methods to ensure the best results. In brief, potatoes are in fact "watered" carbohydrate concentrates. They may be used, therefore, as a substitute for barley and corn, as in the rations of pigs, in which case it is important to bear in mind that four pounds of potatoes are equal to one pound of cereal meal.

This year marks the highest point reached in Soviet science and exploration in the 17 years of the country's existence.

A new type bathysphere now is under construction in a Leningrad scientific laboratory with which the Soviets hope to break the depth record set up by Dr. William Beebe.

This will be the first time that the Soviet has attempted to explore the depths of the ocean, but their success in the bathysphere has made them seek new fields.

In the Soviet campaign of "Conquer the Arctic for the Soviets" 776 ships will sail the Arctic waters this summer, establishing regular routes, prospecting for natural wealth, and filling in the white, unexplored regions on the map.

One ship, the ice-breaker "Sedov," will make an attempt to explore the stretches between 81 and 83 degrees northern latitude where only two ships have been in the past. It is believed that considerable stretches of clear water may be found in this region.

In the realm of aviation new planes are being built and new lines opened. Special "peace-proof" planes, insulated against all cold, have been built for Arctic flying. A trunk line using this type of plane will be opened during the year running all the way from west to east over the top of the world, from Murmansk to the Bering Sea.

Two new stratosphere balloons are being built for flight into the upper layers of the atmosphere this summer. They will have all the safety features possible to safeguard the lives of the pilots.

Future Plane Examined

Advisory Committee For Aeronautics Explain Details Of Year's Work

The skeleton of the aeroplane of 1940 was examined in detail at Langley Field, Va., by 250 aircraft engineers, designers and government officials.

Members of the research staff of the national advisory committee for aeronautics explained in detail the results of their work during the past year in boundary layer control, the airflow development of more efficient compression-ignition engines, and the decreasing of noise.

The new popular price monoplane of the bureau of air commerce was demonstrated in the large-scale wind tunnel, marking its first appearance. The machine has a small cabin, pusher type propeller, front pilot wheel to prevent overturning, and dual vertical and horizontal control fins.

Large Shipment Of Bees

Over 700 Packages From California For Alberta Apiaries

Millions of bees under the care of Prof. Eckert of the University of California arrived at Lethbridge on May 5th to be distributed later to apiaries in Southern Alberta. The 777 packages supplied by beekeepers in Southern California was the largest consignment ever received in the West. Prof. Eckert studied the bees en route and was well satisfied with their condition on arrival in Lethbridge. S. O. Hilliard, Alberta apiarist, met Professor Eckert at Spokane and travelled with him.

Canada exported to all parts of the world during the month of March, 1935, farm machinery and implements to the value of \$412,109. Included in the exports were 1,559 disc, sprayer, shovel and parts; 3,933 disc harrows; parts 9,314 disc ploughs; 456 cultivators. 529 harrowers and binders; 216 mowing machines, and 81 hay rakes. The value of these exports for the 12 months ended March, 1935, amounted to \$3,567,558.

Benzoil is a common source of severe poisoning to women in some industries, having a tendency to destroy the white blood cells and resulting in dangerous anemia.

Finished His Sleep

Lazy Passenger Delayed Three Liners For An Hour

All because one man would not get out of bed, three great liners and more than 600 passengers were held up for an hour, and the whole of the landing service was disorganized at Tilbury Docks, England.

It was 7 a.m. when a big, buff-colored ship from Australia put into the docks. In just over the hour medical and passport examinations had been concluded, and the passengers, with their baggage, had left the ship.

That is, all but one. He lay sleeping peacefully in his luxurious stateroom cabin. Stewards informed him that the liner had been cleared, and was waiting to cast off from the landing stage. The reply was a deep breath.

Later he was again awakened and told that two other liners were waiting in mid-stream to come in and discharge. One was a liner from the Far East with over 400 passengers wanting to know why they could not land. Behind this was a foreign ship with 200 passengers.

Stewards blew in vain. Friends waited on the landing stages. But the ships could not put in till the other had cast away.

And the belated passenger did not leave the first vessel until two and a half hours after it had begun to discharge.

Western Wheat Quality

High Protein Content Due To Climatic Conditions

Over a broad field of specialized knowledge, touching on the scientific work, history, and agriculture of the Dominion, noted Canadian scholars discussed at McMaster University results of extensive research. It was the opening day in Hamilton for the meeting of the Royal Society of Canada.

Back in 1899 the prairie farmers had a taste of dust storms—recent scourge of the west—Dr. E. H. Oliver, of Saskatoon, one time moderator of the United Church, told members of the section.

The high protein content of western Canadian wheat, which has made it valued in the markets of the world, is due more to the climate than to the soil, Frank T. Shutt, F.R.S.C., this year's winner of the Flavelle medal, declared to members of the physical science section. The climate was due, he said, to the high temperatures and scanty rainfall usually prevailing in the prairie provinces in the late summer and autumn months.

Trans-Canada Highway

Lake Shore Route Is Endorsed By Lakehead Cities

Unanimous endorsement of the Lake Superior shore route from Port William and Port Arthur via Nipigon, Schreiber, White River to Sault Ste Marie as the Trans-Canada highway jointly was given by the Chambers of Commerce of the two lakehead cities at a special meeting.

In taking this action the two chambers renewed their affirmation of policy with regard to the undisturbed section of the national road adhered to since various routes first were mooted.

A New Scotch Story

Sir Harry Lauder was the subject of a new Scotch story brought back from Glasgow by George McEwen, official of a Memphis, Tenn. firm that furnished flooring for the singer's new home. "We wanted to take pictures of the room, with our floors," said McEwen on his arrival in New York. "We asked Sir Harry and he was very agreeable about it. He said we could take the pictures and it would only cost us a guinea a room. Yes, we paid."

Trinidad will launch new public works projects in care for unemployed. 2101

WORLD HAPPENINGS BRIEFLY TOLD

Two more Roman Catholic monks have been arrested in Germany charged with smuggling money to the Netherlands, it was announced.

Well-informed quarters said the British government was considering the possibility of holding a seven-power naval conference before the end of this year.

Concluding one of the most successful years in its history, the Canadian Club of New York re-elected Ernest W. Appleby president for a second term.

Deaths in Ceylon's malaria epidemic totalled 82,037 since last November, it was revealed with publication of figures showing 15,933 malaria deaths during April.

L. R. Cordoue, chairman of the Quebec liquor commission, announced that restaurants henceforth will be allowed to sell beer and wine with meals on holidays and Sundays.

James W. Blake, the man who wrote the "Sidewalks of New York," died recently in St. Vincent's hospital, New York. Blake, 72, died penniless. He never received royalties for the song.

Destined for service as a news-gatherer, with the entire Japanese empire as its "beat," a powerful monoplane has gone to Osaka, Japan, on the Tokai Maru. It is the property of the Onaka Mainichi, Japanese newspaper.

Minister of the Interior T. G. Murphy told the House of Commons that \$225,000 will be spent this year on the Jasper-Lake Louise highway in Alberta. The money will be provided in the \$33,000,000 construction bill.

The Canadian Pacific Railway has placed an order for 7,000 tons of rails with the Dominion Steel and Coal Corporation to be rolled at the Sydney plant, it was learned. The plant is now working on a South African order.

Pioneers in Cocoa Business

Founders of Three English Firms Were All Quakers

The Port of London Monthly, which records the export and import trade of the British Empire, digressed from the shipping business in a recent month to relate the rise of three Quaker firms who loom large in the cocoa trade, shipping to all parts of the world. The Editor relates how "after a time the manufacture and sale of cocoa and chocolate in this country were embarked upon by several families of the religious denomination of Quakers. The Frys in the west of England, the Cadburys in the Midlands, and the Rowntrees in York—all belonging to the Society of Friends—were pioneers whose names are all now writ large in chocolate all over the earth. Each of the businesses, beginning in modest style, has now expanded to a size and repute which makes this trio of names known everywhere."

Retains Its Freshness

Freezing Is New Process To Keep Sweet Corn

Government agricultural experts have found that sweet corn frozen within four hours after it has been picked retains its original freshness from six months to a year. Freezing stops most of the changes which normally occur rapidly in corn. In the experiments gathering, grading, husking, scalding and cooling for freezing were all completed as rapidly as possible. The scalding, it is believed, temporarily stops the chemical action taking place in the corn and the freezing permanently stops the action so that if served six months later its original freshness is retained.

A judicious use of flowers is urged by the Quebec Tourist Bureau in its make rural hotels even more attractive, since there is nothing so restful as beds of flowers in front of and around buildings in both town and country.

Don't think the man who makes the longest prayer in public can always get the longest credit.

Have No Individuality

Ants Work As Their Forebears Did 50,000,000 Years Ago

Lord love us, who would be an ant? True, ants do not suffer from unemployment. When you move a stone, there they are, all rushing about and very busy, and all doing exactly what their forebears did 50,000,000 years ago. At least, Professor Dymond, of Ontario Royal Museum, says so. He shows that all the ants have an hereditary occupation, one being a soldier, another a servant, and so on. No social changes ever take place, no reforms. The ant population have no new ideas about government, war, business, family pleasure, or anything else. Custom rules everything with them. The ant goes on tolling not because he is a thinking, intelligent, characterful citizen, but because he has never developed the power of individuality. So he still lives in a mound, or under a stone—London Daily Express.

Peanuts Worth Money

Error Might Have Been Costly, But Man Was Honest

The thrill of an impending Christmas fresh upon him, Louis De Costerio, roadhouse waiter, rushed into a candy store in North Attleboro, Mass., and ordered 25 cents worth of peanuts. At home, he put his hand into the bag and pulled out \$750 in bills. The clerk had given him a bag containing the day's receipts. De Costerio went back and exchanged the \$750 for 25 cents worth of peanuts.

FASHION FANCIES

532

CONSERVATIVELY SMART FOR SUMMER DAYS

By Ellen Worth

For office, tea party or trip to town.

Here's one of those useful little things dresses that are dear to the hearts of the business woman. It's a dress that does for luncheon at a smart restaurant, or for dinner in town.

It's made of exquisitely lovely sheer crepe shadow print in pale to cobaltish blue tones. The collar and bow are of crisp white organdy.

You'll find it very simple to sew with its easily fitted raglan sleeves. Style No. 532 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3 1/2 yards of 39-inch material with 3/4 yard of 35-inch contrasting.

Pattern 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg.

The Spring Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition.

There are clothes for cruising and clothes to brighten the lives of stay-at-homes. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 20 cents.

When Shadows Fall

By WILL R. BIRD

There never has been a more dreadful horror on this earth than that which we call the "Great War." There may have been more cruel slaughters in the centuries before civilization, but never since Christianity and culture became dominant. And there never have been more glorious hours than some of those we lived "over there." Horror—sure! Glory—sure!

It was an evening in late May. We had come from the trenches in front of Avion and were due for a "rest" somewhere. We had come to the sheltered side of the Vimy and the companies were supposed to be quartered in the tunnels. But who could go down in those dank shafts if it were possible to sleep in a snug bivvy you and your side kick had pushed together in a pocket of ground where the grass has grown lush and still held the heat of the sun? We had "salvaged" a sheet of the corrugated, and a few had been made the sides, and there we could lie and gaze at the stars until sleep overcame us, for the corrugated was only in case of rain.

We had rested all the day, with nothing to do but clean ourselves a bit and eat. The boys had been kind, and there was mail from home—Canadian mail. In the soft evening air you seem to hear the musical. Someone up the slope has a banjo and there was a soldier's harmony of popular songs, earnest voices if you will. The boys had run of us the towers of Mount St. Eloi were like sentries in the dusk. Now and then a sentry would be in the village. There were horse lines everywhere.

It was all as the dusk thickened, and transport was to be sent away back. We didn't have to do a thing but yield ourselves to delightful languor. Jimmy read his letter. Some of the boys back in his home town hadn't enlisted, and his poor old mother, with three boys at the front, was a little bitter. We got to thinking of what she had written.

I had we both known appeared suddenly. He belonged to the good old 49th, and we were glad to see he had not been through the Vimy. We talked rapidly for a few moments, then all three of us stilled. Away over near Villers got some infantry were in camp and all at once a bugle blew "Last Post." As the haunting sweetness of that call came over the land it seemed to put a spell upon us. Spring had come. There were flowers where there had been blasted earth and they had the wreckage of old trenches. We were out for rest. We had come through. The voices from Canada were with us, for we had read the 49th had passed on our letters. And something about it all made us suddenly too choked for speech, made us thrill with a pride at being there, and for that moment the glory of being first for men swelled our hearts.

Then we rose and led our friend across the way to where some of thirteen platoon had made sleeping places, and we had created them with German signs that Jimmy had been carrying with him for two weeks. One read "Vimy" and the other "Pierde." The boys thought it grand to have such adornments and were waiting patiently until their stretcher bearers joined them to find out the meaning of the words, and we chuckled together as we explained. The first was "cattle" and the second "horses" and what a time there would be when those lads knew.

We walked back a distance with the Forty-niner, just walked without talking. The night was too fragrant with the falling dew and scent of flower and strong grass, too soothing with the murmur of voices, for us to talk. Then "So long, Joe," "So long, boys."

Back at our bivvy Jimmy and I sat for hours, just drinking in the night, the sounds about us, the guns firing on the Somme, the faint far-away rattle of machine gun fire. As I live, will I forget that night. It seemed to hold us, enthrall us. I wonder where Jimmy is now, if he remembers. It's a long time since that night, but old Vimy is still there. Supposing he's there, trying to find that very little hollow—as I'm going to do—when we go back, next summer!

Are Real Benefactors

The Mitsui family, one of the richest in Japan, has ordered five grammes of radium from the Belgian Congo at a cost of 1,000,000 yen. Four grammes will be placed at the disposal of the Cancer Institute and the other given to the Physical Research Institute.

Dry rot is a name for the decay of timber after it has been seasoned. Dry rot is usually slow in action.

Fletchery is a key that has opened many a feminine heart. 2101

SUNDAY SCHOOL LESSON

JUNE 9

THE HOLY SPIRIT

Golden text: As many as are led by the Spirit of God, these are sons of God. Romans 8:14.

Devotional Reading: John 14:26-31.

Explanations And Comments

What the Comforter Will Do, John 16:7-11. Unless he went away, Jesus told his disciples in his farewell talk, the Comforter would not come, but if he went he would send the Comforter to them. The world Comforter, used for the Holy Spirit, means One who strengthens, upholds, rather than One who consoles. Advocate, Helper, are other translations of the Greek word given in the Bible footnotes.

It was best for his followers that he should leave them, Jesus said. How could it be for their advantage to their best interest, to lose the daily companionship of their Lord? The Holy Spirit is the continued Presence of Christ himself. The Spirit revealed Christ to them, made plain the spiritual truth of his teachings. They knew Christ better after he had left them. While he was with them they were weak, unable to walk alone. After he went away, leaving them as his witnesses to carry on his work, they became towers of strength. Great leaders, who continued all that Christ had begun to do and teach.

When the Holy Spirit has come, he will convince men of sin, that it is a sin not to believe on Christ; of righteousness, because Christ was going to the Father. "The Holy Spirit will convince mankind that Christ is a sincere and righteous Teacher, because as they had thought, an impostor, as will be clearly demonstrated when the Father has raised him from the dead and set him at his right hand in heaven" (Dummelow). The Spirit will convince of judgment, of condemnation, because the price of this world had been judged. "Did not sin in Canaan, in the rulers, in Pilate, in the multitude, uncoil itself as if by an irresistible compulsion, and at last exhibit its ghastly terrible length? We say sin was exposed on that day—judged," said Christ; "the price of this world has been judged; not punished, but exposed and condemned. Judged as a prisoner in court is judged when he is found guilty and sentenced, even before he has the hand of the law taken from the bar" (Thomas E. Bartlett).

Recipes For This Week

(By Betty Barclay)

OLD FASHIONED STRAWBERRY SHORTCAKE

- 2 cups flour
- 1/2 teaspoon salt
- 2 tablespoons sugar
- 4 teaspoons baking powder
- 3 tablespoons shortening
- 1/2 cup milk
- 1 quart berries

Sift dry ingredients; mix in shortening; add milk to make soft dough; smooth out lightly. Bake in greased deep layer cake tin in hot oven at 475 degrees F. for 20 to 25 minutes. Split, butter and spread sweetened crushed berries or other fruit between layers.

KEDGEREE (A Breakfast Dish)

- 2 cups cooked fish, fresh or canned
 - 4 tablespoons butter
 - 1 cup cooked rice
 - Salt and pepper
 - 2 hard-cooked eggs
- Free the fish from skin and bone. Melt butter in a saucepan, add the fish and stir gently. Put in the rice, the yolks of the hard-cooked eggs, and season to taste with salt and pepper. Move gently about over the fire until thoroughly hot, and serve on a flat dish with the yolks of the eggs, pressed through a ricer, over the top.

Reason Soap Will Float

Any soap can be made to float by manufacturing it by a process that presses air ducts into the bar, says Popular Mechanics. These ducts also speed up curing, permitting the soap to dry out from the outside. So small are the ducts that they retain air, preventing water from entering. This results in floating. The old method was to beat air into the soap before it was shaped into bars. This made soap porous, since it was filled with minute air cells.

A male stenographer wouldn't quit a \$25 job to wash dishes for nothing.

Little Journeys in Science

FLUORINE

(By Gordon P. Quast, M.A.)

All chemical elements may be arranged in families. The members of which are closely related. Fluorine, chlorine, bromine, and iodine make up a remarkable family of non-metallic elements. The group as a whole is often called the halogens, which means producers of sea salt. They were given this name by scientists because compounds of these elements are found in sea-water. These elements have a very strong tendency to combine with metals and with hydrogen to form compounds known respectively as fluorides, bromides, and iodides, which are often called the halides. Some of the halides, such as sodium fluoride, sodium chloride, potassium chloride, and silver bromide, are of great commercial importance.

Fluorine occurs abundantly in the minerals fluorapatite and cryolite. Traces of fluorine compounds are found in the bones and enamel of teeth, and small quantities have been detected in the blood, milk, and human excreta.

Fluorine is the most active element known, and was not prepared until 1886. This difficult task was accomplished by a brilliant French scientist, Moissan, who also produced diamonds from pure charcoal. He obtained fluorine by the electrolysis of a fluorine compound in an apparatus constructed of platinum. Fluorine was given off at the positive electrode.

Fluorine is a pale greenish-yellow gas which may be condensed to a pale yellow liquid. It combines so violently with hydrogen, even in the dark. Many other elements, such as carbon, phosphorus, and arsenic, catch fire spontaneously on contact with it. It is interesting to know that fluorine and oxygen combine to form a compound. One of the most useful compounds of fluorine is hydrofluoric acid. This acid attacks glass, and hence must be kept in bottles made of gutta-percha or ceresin, a sort of hard mineral substance. It is used for etching glass. For etching the glass is covered with a film of wax, and the design to be etched on the glass is drawn on the wax with a stylus. This acid is then applied to the surface and in a short time the design is etched. It was then removed with turpentine.

Greenwich Clock Being Overhauled By Experts

Has Been Stopped For First Time In Over Eight Years

The clock which gives the world Greenwich Mean Time has been stopped for the first time in eight and a half years.

Its 268,000,000 ticks, one to a second, may have impaired its working slightly, so the officials at Greenwich Observatory have decided to have it overhauled.

"The clock is the result of a series of four used for astronomical observations," an official of the observatory said. "It has established a record for the number of years it has run without stopping. Highly skilled workmen will undertake the delicate task of overhauling it. In the meantime, we will use the time signals by the three other clocks. They are all 'master' clocks driven by electricity."

A Colorful Memorial

Man Builds Wonderful Garden In Memory Of Son

Gideon Price, sixty-eight years old, of Lethbridge, N.C.—the "tulip king" of the world, with a garden of 100,000 tulips—has built up his garden as a memorial to his son who died overseas during the World War. Only Price has worked in the garden. The plots, giant color combinations that an artist would conceive, are all his. Last year he left only 5,000 tulips in the ground. He has set out at least 95,000 this year. For fear that he might run out of work this summer, Price had about 15,000 gladioli to set out. And there are hundreds of lilies and anemones bulbs.

Origin Of Old Believed

Ancient sailors believed that the halcyon, a bird of the kingfisher family, nested on the waves about the time of the winter solstice, and that the sea remained calm and peaceful during this period; hence the term "halcyon days" for times of peace and tranquillity.

Paris plans a new intellectual centre called the International City of Thought and the Arts.

THIRD READING IN SENATE FOR INSURANCE BILL

Ottawa.—After two Liberal amendments had been voted down, the unemployment insurance bill went through third reading in the senate.

An amendment moved by Senator Raoul Dandurand, Liberal leader, that employees in non-manual labor receiving salaries in excess of \$2,000 should come under the bill and contribute to the insurance fund was defeated on division by 20 to 12. Hon. James Murdock (Lib., Ottawa) voted with Conservatives; but, with this exception, party lines stood solid.

Exception of employees of banks and financial institutions, bringing the measure back to the provision it contained when passed by the commons, was moved by Senator Walter E. Foster (Lib., Saint John) but was lost on a call for "contents" and "non-contents." The former New Brunswick premier, a bank employee for a time in his very early career—encountered opposition from Rt. Hon. Arthur Meighen, senate leader; Senator W. A. Buchanan (Lib., Lethbridge), Senator W. A. Griesbach (Cons., Edmonton) and Senator Murdoch.

"My amendment will put the employee receiving a modest salary on a parity with those who receive more than \$2,000 per year," Senator Dandurand stated. Two-thirds of contributors to the insurance fund would not benefit under the act.

"I reckon 25 per cent. of those contributors would be the utmost in times of a great crisis who would become unemployed," he declared. It would be unfair for many employees with modest salaries, Senator Dandurand argued, to have to contribute \$13 per year while those earning more than \$2,000 annually would be "free from the element of taxation."

"I am afraid the amendment is only to give the hon. senator a chance to say he wanted to tax the big fellow," Senator Meighen declared. The amendment ignored the intent and purpose of the measure. This was not a tax bill but a measure dealing with unemployment insurance and taxation in the area that would be benefited for that insurance.

The amendment, the senate leader continued, would reach the wrong man. "He (Senator Dandurand) wants to make the fellow earning a salary pay, but the rich fellow who does not have to earn a salary would not have to pay under the amendment."

Irish Free State Neutrality

Would Not Be Used As A Base For Attack On Britain

Dublin.—President Eamon de Valera assured the dail the government would never permit Irish Free State territory to be used as a base for an attack upon Great Britain by another power.

Replying to an opposition onslaught, De Valera said war in Europe might possibly develop into a very serious situation for the Free State. He said the Free State would do everything in its power to defend its own territory.

The president said the government was prepared to draw up an agreement with Britain and to purchase from her, pound for pound. It was even prepared to give her a preference when the Free State had to buy goods outside the country.

Celebrates His Birthday

Famous Dr. Dafoe Entertained By Newspapers Of North Bay
Newspapers of North Bay, Callander, Ont.—Dr. Alvin Roy Dafoe was all but smothered under an avalanche of congratulations as he celebrated his own 52nd birthday and looked back on the happy observance of the Dionne quintuplets' first birthday anniversary.

Newspapers marked the double event on May 28 by entertaining Dr. Dafoe at dinner in North Bay and presented him with an engraved silver pitcher.

First Official Crop Report

Conditions In Prairie Provinces As A Whole Are Hopeful

Ottawa.—The Dominion bureau of statistics issued the first of 15 weekly telegraphic crop summaries covering conditions in the prairie provinces and said crop reports as a whole were "hopeful," although correspondents pointed out "sub soil (moisture) reserves are negligible in many districts and in these areas crop development will depend upon current rainfall."

The summary of the report said: "The seeding and early development of the 1935 wheat crop of the prairie provinces have taken place under vastly different conditions than existed a year ago. During the month of May generous rains were received over the 'drouth' area of Saskatchewan and in parts of central and northern Alberta, seeding has been seriously delayed by heavy rains."

"Only a few areas in the three prairie provinces report the need of seed at the present time. Hatching of grasshoppers has been delayed by the cool, wet weather but outbreaks may be expected shortly. Wheat seeding is nearly completed in Manitoba and in many areas in Saskatchewan and the seeding of coarse grains is well advanced. In Alberta, seeding of wheat is almost completed in the southern part of the province, but in the northern areas a great deal of land intended for wheat is not sown as yet."

Makes Protest

Hon. H. H. Stevens Objects To Statements Made At Inquiry

Toronto.—Hon. H. H. Stevens M.P., suddenly appeared before the inquiry into the affairs of the Manufacturers' Finance Corporation, of which he was a former director. He stated he intended to demand a hearing.

Mr. Stevens listened to proceedings without interruption until that part of the report made by Joseph Sedgwick, K.C., of the attorney-general's department, was read concerning Mr. Stevens' activities as a director of the bankrupt corporation. Mr. Sedgwick had stated Mr. Stevens had received \$200 as "overseas expenses" from the corporation.

Mr. Stevens jumped to his feet and exclaimed, "No, no." His counsel, Norman Somerville, K.C., interposed. "That just shows the effect of having this evidence produced without allowing us a chance to prepare. Mr. Stevens did not receive any money to go overseas from the company and did not go overseas for the company. He did not receive a nickel."

Commissioner J. M. Godfrey, K.C., stated following Mr. Stevens' report he would give Mr. Stevens an opportunity to give his explanation.

Letter Mailed Too Late

Ottawa.—The city post office disclosed receipt of a letter postmarked and addressed to Col. By, Major Hill Park. The name and address were right but the letter should have been mailed at least 99 years ago before Col. John By, who founded Bytown, later Ottawa, and built the Rideau canal, died. Post officials said the postmark was recent. They sent the message to the dead letter office.

For Shorter Hours

Victoria.—Shorter working hours for postal employees is sought in a resolution passed at the closing session of the British Columbia branch of the Canadian Postmasters' Association here. The resolution, which was forwarded to the national executive, asked for a 44-hour week, with powers for the postmasters to regulate the working schedule according to local conditions.

Few Will Return To Fatherland
Saskatoon.—Few of the Germans here affected by the conscription ruling of the German government will return to the fatherland for military duty, leaders of German organizations said when they reported that many of their compatriots were taking immediate steps to secure Canadian citizenship and thus avoid a year's military training. 2101

GEORGE OF GREECE

The possibility of a reconciliation between ex-King George and ex-Queen Elizabeth of Greece is stated to have been discussed in Bukarest between the Greek Foreign Minister and the ex-Queen herself. A reconciliation it is stated, would be a preliminary to an eventual restoration of the monarchy of Greece. Here is a recent picture of the ex-King.

Storm Causes Heavy Damage

Property Loss Near Sarnia, Ontario, Will Total \$75,000

Sarnia, Ont.—Two persons injured and property damage totalling \$75,000 was the toll of a severe storm which swept over a small area in Sarnia township, eight miles east of here.

Two houses and seven barns were destroyed, roofs torn off other buildings, orchards uprooted. A highway was strewn with trees, telephone poles and wires for about a mile, as a wind of tornado proportions accompanied a severe thunder storm.

The storm passed over the city without doing any damage. Worst damage was done in a narrow strip on each side of the provincial highway.

Monk Sent To Prison

Heavy Sentence Is Imposed In Nazi Court

Berlin.—A Nazi court meted out the heaviest penalty possible on Otto Goertler, a monk, charged with violation of the foreign exchange laws. Goertler was sentenced to 10 years in the penitentiary, loss of citizenship for an additional five years and was fined 350,000 marks (about \$140,000). If the fine is not paid the monk must serve an additional 27 months in prison.

Shares of the Farben industry, valued at 44,000 marks, will be confiscated from the monastery to which Goertler was attached. The monastery also was fined 600,000 marks.

PRINCE FREDERIK AND HIS BRIDE

Stockholm, Sweden.—Two hundred thousand cheering Swedes packed Stockholm's streets to bid farewell to Crown Prince Frederik of Denmark and Princess Ingrid of Sweden. Frederik's bride and Denmark's future queen. Their brilliant wedding in the 13th century church where all kings of Sweden's Bernadotte line have been crowned, was attended by such an assembly of crowned heads, royalty and notables as Scandinavia seldom has seen.

Improvement Shown In Employment Situation

Report Shows Increase In All But Maritime Provinces

Ottawa.—An improvement was shown in the employment situation on May 1 in all provinces, while the Maritime provinces was the only economic area to show a decline in comparison with May 1, 1934, the Dominion bureau of statistics reported.

Reports received from 9,203 firms show 892,506 at work, a gain of 17,457 compared with the preceding month.

The crude index, higher than any year since 1931, stood at 95.2 against 92.0 on May 1, 1934, and 77.8 in 1933.

In the prairie provinces, 1,339 firms reported 110,815 employed against 109,492 on April 1. Gains were shown in manufacturing, lumbering, iron and steel, and coal mining while logging was seasonally slacker.

Bids Constituents Farewell

Lord Tweedsmuir Expresses Thanks For Kind Treatment

London.—Lord Tweedsmuir, who represented the Scottish universities in the House of Commons until his recent appointment as next governor-general of Canada, formally said farewell to his constituents.

"There cannot be many constituents which treat their members with greater forbearance and kindness, which make fewer demands on his time or which extend him fuller and friendlier confidence," said his message.

"My eight years as their representative have enabled me to learn much about university life in Scotland, but I fear the benefits have been one-sided and that I have given very little in return for what I have received. Now I have to bid them a regretful farewell, I would offer them my most grateful thanks for their manifold kindnesses."

Motors Across Channel

German Sportsman Negotiates Crossing In Automobile

Dover, England.—A novel amphibian motor car clambered, dripping wet, on to dry land here and rolled on toward London after crossing the Channel from Calais in eight hours and 20 minutes. The machine was operated by Jacob Boulig, German sportsman.

It was the first such crossing but such a motor car, equipped with paddlewheels is not likely to prove popular, since regular Channel steamers from Dover to Calais make the trip in about an hour.

PRICE SPREADS IN CARS SHOWN TO TARIFF BOARD

Calgary.—Large price spreads exist between identical models of automobiles in Alberta and Montana the tariff board learned in a final Calgary session.

Continuing the automobile inquiry, which started at Vancouver, the board members were told that duties made prices of United States cars almost prohibitive in Alberta, and that Canadian automobile manufacturers were competing unfairly in the "parts" business with local jobbers.

J. L. Stewart, general manager of the Canadian Automobile Chamber of Commerce, submitted reports showing that both taxes and freight rates were considerably higher in Alberta than in Montana. On one light model car the government tax in Butte, Montana, was \$19. The tax on the same car in Calgary was \$40.63.

On an eight-cylinder model selling for \$1,500 in Butte, the tax there was only \$33.60 compared to \$138.33 in Calgary.

A. L. Smith, K.C., representing a group of Alberta jobbers, asked the board to investigate fully a charge that manufacturers were importing parts from the United States duty free, ostensibly for manufacturing purposes, and were then retailing the parts in competition with jobbers who had paid full duties.

W. H. Poole, of the department of economics at the University of Alberta, who prepared a comparative schedule, reported differences in prices as high as \$310 on stock model cars sold at Selby, Montana, and Lethbridge, Alta.

Tribute To Dr. Cora Hind

Women's Press Club Honors Western Journalist

Ottawa.—Tribute by newspaperwomen of Canada to Dr. E. Cora Hind of the Winnipeg Free Press as "one of the greatest of their cult," was paid by the Canadian Women's Press Club here at a banquet by the government tourist bureau.

Held in the palatial restaurant, the function, of which Hon. R. J. Manion, minister of railways, acted as host, was attended by nearly 200 female members of the craft, with a mere quintette of males "gracing" the proceedings.

The eulogium on the service rendered to Miss Hind, upon whom the University of Manitoba a few days ago conferred the honorary degree of doctor of laws, was pronounced by Miss Charlotte Whitten, C.B.E.

Dr. Manion sketched to his hearers a picture of the tourist bureau's work, paying tribute to Hon. W. H. Dennis of Halifax, who had been chiefly responsible for its establishment, and to D. Leo Dolan, who directs its activities. Last year, the minister said, the Canadian people derived more money from the expenditures of tourists than they did from the sale of wheat. The significance of the industry was illustrated, he said, by the fact the state of Maine alone had a revenue of \$100,000,000 annually from tourists.

Police Patrol Going North

Disappearance Of Trapper Last September To Be Probed

Prince Albert.—A Royal Canadian Mounted Police patrol will leave shortly for Folkestone lake, 300 miles northwest of here, to investigate the mysterious disappearance of Jean Baptiste Lemeux of Montreal. The 25-year-old trapper has been unreported since he left his lake cabin last September.

Lemeux set out for the north country from Edmonton late last summer. With him were Carl Damur and his wife. The trio planned a trapping season in "a sort of partnership." Shortly after they had established a trap-line, north of Froebush lake, 280 miles north of Battleford, Lemeux disappeared.

Damur left the cabin to visit a neighboring trapper. When he returned his young partner was missing.

Don't Buy an Automobile

until you have looked over our reconditioned used cars; all at real bargain prices. Come in look these over, for your satisfaction. We have a variety of makes to choose from—

- 1928 SPECIAL CHEVROLET SEDAN,
- 1929 PLYMOUTH STANDARD SEDAN
- 1929 FORD TRUCK
- 1929 CHEVROLET TRUCK
- 1929 GRAHAM-PAIGE COUPE
- 1930 MARQUETTE SEDAN
- 1930 OAKLAND SEDAN
- 1930 GRAHAM SEDAN
- 1932 PLYMOUTH SEDAN, Special

All these Cars are Re-conditioned. Low Prices and Good Terms.

Presentation to Pastor.

Complimenting Rev W.E. and Mrs. Sieber, who are leaving to manage the Alberta, Protestant home in Edmonton shortly, a social was held in the United Church last week when the guests of honor were presented with a handsome silver tea service.

Spruce Grove News.

Services will be held in the Peace Lutheran Church Sunday next, June 9, by Pastor H. Kuring.

S. G. Hi. basketball girls won from Stony Girls team at Monday night's game by 28 to 14.

Spruce Grove district had a big representation present at the Social Credit convention up at Stony on Saturday. Mr. D. Brox was one of the 11 nominees for the candidacy, and was a close contender until practically the last ballot.

Monday, 70th anniversary of King George's natal day, was observed in a very quiet manner at the Grove.

Farmers of the district are still pretty busy—most of 'em working on the 18 hour schedule.

Mr. Harry Brox is planning a motor trip to Killam for Saturday.

Mr. D. Brox returned early Tuesday morning from a motor trip to Calgary, when he accompanied the Social Credit nominees when they appeared before the Advisory Council.

The regular forest of gas pumps along Railway avenue is now getting so thick travelers complain that only a few of the buildings are visible. Dan says Social Credit promises a gas pump to every car.

SPORTING NOTES OF LOCAL INTEREST

What a week was there, my countrymen! The sport bug certainly made up for lost time and despite a bad week end which washed out one ball game, the last week was crammed with activity.

Since the air is just murky with the basketball news, we will begin with the topic of the day. Quite a few of the local sportsmen went to Edmon-

W. E. HAYES,
Winner of Men's 1st prize at the recent Golf Tourney.

ton to see Grads win out in a tough series, and we hear quite a few wagers were won and lost.

To come closer to the home-grown product, Stony Girls Sr. basketballers won a good game from W.L. by a 31-21 score; both teams played hard, but the victors took the lead and looked like champs all thru. Later in the week W.L. girls again fought hard against taller opponents and lost out to Bright Bank 23-15. This Bright Bank bunch looked as if they knew what the game was all about; and, snooping around, we were informed they were coached by a Stony girl—a product of W.L. Naturally we doffed our old chapeau to Anna Miller.

Last Wednesday the Golf club was officially opened with a tournament and social. Everyone enjoyed themselves, and a good turnout was on hand for the lunch.

Next Wednesday the Tennis Club will hold its first social. This will probably be a home brew affair, and all players and families are asked to keep this an open date. The courts are in good shape, and a good season expected.

In the Softball League 3 games have been played. In the best game seen this year Hawks kept top position by defeating Pelicans 5-3. The game was played in record time, few errors being made. Next day Pelicans spoil their good record, but managed to defeat Benedicts 22-19 to regain third place. In the other fixture Canaries downed Benedicts 15-9 to keep second place.

Some weeks ago an attempt to form a baseball league failed. The parties interested around Stony were not ticked yet, and now a Steam league has been formed and scheduled games already started. Teams—Centrals, Bright Bank, Keep Hills, Hansen's Corners. W.L. The games should keep interest in baseball at a fairly high level for this season. Last year, with no league, interest was practically an unknown commodity, except for the games on Sports Day. We give all hearty support to the venture; and here's hoping the locals develop into a real ball team.

The first game was played Sunday, when W.L. downed Centrals by 14-5. P. Urrel put 1 in the tennis courts. The next game for Stony in the League is a double-header next Sunday. Before that, Spruce's great team plays here on Friday. Sounds good!—H. G. O.

ALL FOOD MADE HER
ILLCaused by Acidity—
Corrected by Kruschen

"It is only fair to pass these facts on," writes a nurse. "I was suffering from over-acidity and flatulence to such an extent that I was completely ill. I couldn't take food. When I actually forced myself to take something, it would be wretchedly ill. I have now taken Kruschen for 12 months, and I have no doubt that it has righted my digestive system. I am now quite fit and able to work with vigor again."—Nurse E. S.

Indigestion is caused by a failure in the flow of the gastric or digestive juices. As a result, your food, instead of being assimilated by your system, simply collects and ferments inside you, producing harmful acid poisons. The immediate effect of the six mineral salts in Kruschen is to promote the healthy flow of the vital juices of the body. As you continue with the "little daily dose," it cures the regular and complete elimination of all waste matter every day. And that means a complete end to indigestion.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

Now Go On With The Story

CHAPTER III.—Continued

There were also plans to make for Aunt Judy, who was to sail in a fortnight. The air was filled with a subtle confusion and unrest. And then one late afternoon, returning from a tea to which her mother had urged the girl to go, Nancy spied a telegram on the hall table. It was addressed to Jack, but she grasped the envelope eagerly, her heart pounding as she tore it open. A dim hope that Cousin Columbine would be white-blanket the whole idea, swept through her, but the message, electric and to the point, read briefly:

YOUR LETTER SHOWS YOU TO BE A TRUE NELSON STOP CAN GET JOB ON RANCH THREE MILES FROM HERE STOP SORRY TO HEAR OF YOUR FATHER'S REVERSES STOP IF NOTIFIED WILL SEND CHECK TO COVER EXPENSE OF TRIP FOR BOTH OF YOU STOP ADVISE COME AS SOON AS POSSIBLE—COLUMBINE NELSON.

Nancy read this twice, her hands gripping the paper tensely. She was still staring at what seemed an evocative sentence at hand labor, when her father entered the room so quietly that she had no chance to conceal the tell-tale yellow message. He asked, a touch of alarm in his voice: "What's happened?"

She glanced up, forcing a smile of reassurance.

"Nothing to worry about. It's a telegram for Jack. No bad news, Daddy."

"Let's see, daughter."

He stretched out a hand, but Nancy thrust the paper into her coat pocket.

WHEN YOUR DAUGHTER
COMES TO WOMANHOOD

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Sold at all good drug stores.
**Lydia E. Pinkham's
Vegetable Compound**

"No," she said, "you'll have to wait till Jack comes home and tells you. He took Aunt Judy over to the Spears' on some last errand."

She moved away, his eyes following her, puzzled.

"But who's it from, Nancy?"

The girl laughed.

"You're just as curious as an old woman, Dad; but I promised not to tell, and I'm not going to. You won't have long to wait. It's almost dinner time. Here's Aunt Louise."

She darted off before he could question any further, but as she reached her room a voice recalled her, and Jack, who had come in close on his aunt's heels, was up the stairs.

"Hi there! Dad says I've got a telegram. What luck?"

Nancy held it out, watching him read it. The boy drew a deep breath of relief.

"Good! That's settled then."

"It's not if Dad objects, or—Mother."

She wouldn't keep the shamed hope out of her voice, and catching his meaning Jack said scornfully: "Don't be a slacker, Sis. Come down and see how they all react. Every one's there, even the kiddie. We'll take a vote. Buck up, Nancy. It's a pity you can't help out when all the rest of us are trying to."

That hurt. Nancy turned away to hide the tears which sprang into her eyes. A slacker! Well, she'd show him! If only she wasn't so beastly scared at the idea. . . .

"Be down in a second," she said as her brother made an impatient gesture; and then added angrily: "And don't you call any names before the others!"

"Oh, see here!" He followed her into the room, closing the door. "I didn't mean anything, Sis, honest. I was only afraid they'd see how much you hate to go, and put their feet down. Come on now. Let's get it over before dinner."

The family's rebellion was very nearly unanimous.

Said Dad: "If you must have jobs, both of you, surely we can find something nearer home."

Said Aunt Louise: "You're too young and impressionable, Jack, to spend six months or so in rough surroundings; and Nancy would die of boredom if of nothing worse. What put such a wild idea into your head?"

"He was only trying to help," defended Aunt Judy with her unwavering loyalty. "But Colorado is terribly far away, Jack. I'd worry my head off," while Phil, the ten-year-old, exclaimed excitedly:

"Geef folks. I'd like to be a cowboy! Just think of quitting school and staying outdoors all day!"

And strangely, this innocent remark of her younger son was what stopped the protest on Margaret Nelson's lips. In a flash she remembered that not many months ago the family doctor had said of Jack: "If that boy were mine I'd let him get out of school for a year or two and live outdoors. A job on a farm would be worth considerably more to him than a diploma."

Yet because Jack seemed reasonably well this good advice had not been taken very seriously. But now, looking up at the five-foot-eleven inches of too-thin boyhood, those warning words came back, and to the complete surprise of everybody Mother said: "It would be a splendid thing for Jack—an outdoor winter in a milder climate; but—"

"You're not implying," broke in her husband, "that you'd let those children go off there all by themselves?"

"Children!" This exasperated exclamation came from Jack. "I'll say if Nancy is old enough to be launched in society with a big splurge, she's old enough to be away from home for a few months—with a relative too. As for me, Dad, you bet I'll have to do a man's work or lose the job. Why, I'll be eighteen on—well, on my next birthday."

Since his previous birthday was only six weeks back, this brought a laugh. Then Aunt Judy said: "And what does Nancy think of all these plans?"

The girl hesitated. All eyes had turned upon her; but, glancing up she saw only her brother's, and responded gamely: "It would be something new, wouldn't it? And it

For Baby's Bath

More than that of any other member of the family, baby's tender, delicate skin needs the greatest care and attention. The soft, soothing oils in Baby's Own Soap make it specially suitable for babies, and its clinging fragrance reminds one of the roses of France which help to inspire it.

"It's Just for you and Baby too" 25-28

couldn't be very much duller than Edgemere."

"But, Nancy!" protested her father in distress, "you'd be living with an old lady, one you've never seen and who we've reason to believe is eccentric. And if she paid your fare you'd be in duty bound to stick it out a while, no matter what you found."

"But I'd be earning my living," she retorted, wondering why she was arguing on the wrong side, and what had got into her. Why, in fact, didn't she tell them the whole truth—that she was frightened stiff at the prospect—would almost rather die than spend a winter with Cousin Columbine, but was ashamed to admit it before Jack?

"Well," declared Aunt Louise, "it's the most extraordinary plan I ever heard of. And from Nancy! As I said before, what put such an idea into your heads?"

"Circumstances, of course," spoke up Aunt Judy. "They were to help through the hard sledding; and I think they're splendid. But how could we let you go so far from home, dear? You might be sick."

There followed a silence before Mother said: "I'm not in favor of this move yet; but I'll have to admit that according to doctor Strong Jack's more likely to be sick if he stays in school." She went on to tell them of the doctor's chance remark, and added: "I thought at the time that he was over cautious, Jack seemed so well; but the boy has grown appalling; and I dare say life in the open air would build him up if he didn't have to work too hard."

Aunt Judith sank back and stared at her sister.

"I'd never have expected that—from you, Margaret. But if you ask me, Nancy will require of loneliness in about one month. What will she do with no young friends to run around with, and Jack three miles off on a ranch?"

The boy laughed.

"You talk as if the population of Pine Ridge was made up of inhabitants over seventy. Aunt Judy! Didn't Cousin Columbine mention a postmaster's daughter? And of course there are others. Who knows but Nancy will find her—her affinity or whatever they call it, out in the big wild West?"

"Aunt Judy!" smiled Aunt Louise. "Where did you pick up that nonsense? And it's far more probable that what she'll find is a devastating attack of homesickness, young man."

"Well," Jack retorted, "that's nothing fatal."

"It might as well be," observed his father. "I remember spending a summer at my grandmother's farm when I was twelve. I expected a real lark, but—homesick! Well, I warn you kids that homesickness is no light matter."

"I suppose you'll be riding horseback all day long," spoke up the little

brother enviously. "I wouldn't think of being homesick if I had a horse, Daddy. Will you wear a four-gallon hat, Jack? And leather chaps with fringe all down your legs like they do in the movies? Gee! I wish I was going too!"

"We don't know yet whether anybody's going," returned his father. "Where's Cousin Columbine's letter, Margaret? Let's make sure what is expected of our Name."

There ensued a fruitless search for the long epistle; but Mother said: "I remember those duties pretty well. Jim. Nancy was to dust the mansion every morning, get supper Thursdays, sew, read the paper about, get to bed by nine-thirty."

"And abstain from the boy friend," chuckled Jack. "I admit that last is a big order—for Nancy."

"A lot you know if you think I'll run around with those country pumpkins," replied his sister. "Would any fellows who could help themselves stay in a back-woods place like that? And I've no interest in the other sort, so Cousin Columbine needn't worry about those young men callers she mentioned. And you needn't either." Nancy told her mother with a smile.

"I suppose you'll see Pike's Peak," observed the small boy thoughtfully.

"I'll rise fourteen thousand feet above the plains, and was sighted by Zebulon Pike in November 1806 when with fifteen soldiers he climbed to the summit of Cheyenne Mountain and—"

"You see," broke in Jack, grinning. "That's the boy who ought to go to Harvard! Imagine me reciting whole pages out of history, Dad! Why in—"

He stopped abruptly because the curtains at the door had parted and a maid announced: "Dinner is served, Mrs. Nelson. And," (she came forward extending a silver tray on which was lying a yellow envelope), "here is another telegram for Mr. Jack."

CHAPTER IV.

Jack took the telegram, staring at it for a surprised moment. Then Phil cried out impatiently: "Why don't you read it? I bet you anything that Cousin Woodbine has changed her mind."

"Woodbine!" Jack shouted, while even Dad forgot his worries in amusement at the little boy's mistake. "The lady's name is Columbine, you crazy kid, and," (tearing open the envelope), "she says: 'ADVISE BRINGING PLENTY OF HEAVY UNDERWEAR AND FLANNEL NIGHTGOWNS FOR NANCY STOP NIGHTGOWNS AND EARLY MORNING AIR TO BE WORN. COLUMBINE NELSON.'"

"I'd give a lot to see Nancy in a flannel nightgown," observed Phil dryly. "Mrs. Grant had one on the night I slept over at Tim's house, and she came in to give him some medicine. It made her look like an old lady. I bet Nancy wouldn't be found dead in one, or Mother either. Come on. Let's eat."

Dad was still smiling as they moved towards the dining room; but once seated, he looked across at Mother and his eyes clouded. Both were thinking that this would be the last well-served dinner in the old home. Two maids were leaving next day; and only the cook was to remain until the city house was closed. Remembering this fact, Aunt Judy had stopped at a florist's on her way home, and a dozen jonquils nodded

1000 PAIRS
OF MONARCH DEBUTANTE
SILK STOCKINGS
Free!

Go to your druggist or department store and buy RIT dye (any color, 15c-2 for 25c). Use it. Then tell us a statement of 50 words or less, why you prefer RIT—1,000 pairs of Monarch Debutante full-fashioned—shadow-free pure silk child stockings—later Spring shades—guaranteed \$1.00—will be given so prizes to 1,000 entrants. There are dozens of reasons why you will prefer RIT. RIT comes in 33 basic brilliant colors, from which can be produced over 200 of the newest Paris shades.

FAST COLORS WITHOUT BOILING! Only RIT offers this advantage! RIT is the modern tint or dye—easy and sure—far superior to ordinary "surface dye" because it contains a patented ingredient that makes the color set in deeper, not faster and less longer. Sold everywhere.

HOW TO WIN

1. Write a short statement (under 50 words) on why you prefer RIT (dyes and so on) to other dyes. Put an "X" in the package (or reasonable facsimile) and your name and address, to John A. Hutton Co. Ltd., 42 Adelaide St., Toronto.

2. Send as many as you wish; contest closes midnight June 25, 1935.

3. 1,000 prizes will be awarded on the decision of the judges, which will be final. Whether you win a pair of silk stockings or not, we will mail to all entrants free of charge, our famous booklet—"The A.B.C. of Home Rug Making."

RIT
TINTS AND DYES
RIT is the modern tint or dye—easy and sure—far superior to ordinary "surface dye" because it contains a patented ingredient that makes the color set in deeper, not faster and less longer. Sold everywhere.

NOT A SOAP!

gaily from the centre of the table. Aunt Louise, eyeing them with disapproval, started to say something about "foolish extravagance," and then held her tongue. After all, she thought with extraordinary tact, if Judy wanted to spend money for something perishable in these hard times, it was her own business.

So Judith Hale's "extravagance" (the last she was to indulge in for many months), remained uncorrected, adding a note of cheer to that dinner table, as she meant it to; yet as the moments passed Mother kept thinking sadly of how soon they would all be scattered—separated. She, Dad, and the little boy at Edgemere—Judith in Europe—Louise alone in a city boarding house—Jack and Nancy. . . .

This last she refused to face just then, and said when Jack resumed the subject: "Oh, let's forget it, dear, while we eat dinner."

"But we've got to decide, Mother," he persisted with impudence. "I dare say Cousin Columbine's expecting a telegram to-night."

"Never mind," put in his father. "It won't hurt the old lady to wait for a message until tomorrow. But we'll decide the question this evening, Jack. I promise you. After all, it's as easy to face things now as later."
